Dear Steve:

Thank you for your very friendly note of February 3.  
Of course I recall that you are among the people who have  
known me the longest and still remained in scientific  
contact through the years. I am sure that you were among the  
first in my circle of acquaintances to stress the importance  
of DNA; and in fact I wonder if you have any comment or backup  
documentation about the enclosure.

In any event, again, thanks for your felicitations.

Sincerely yours,

JL/gel
